

TOGETHER WE CAN SAVE

SAVE MONEY, SAVE WATER

JUNE 2020: TOWN OF NORTHLAKE WATER USE

100% OF WATER SUPPLY

Town water use has reached or exceeded 100% of the Town's daily subscription on 5 of 11 days this June.

Exceeding our daily subscription forces the Town to purchase additional capacity that will not be needed the rest of the year.

WATER CONSERVATION IS EVERYONE'S RESPONSIBILITY

By making just a few changes to your lawn and landscape irrigation routine, you can lower your monthly bill and help the Town stay within safe water supply levels.

DO NOT WATER AT NIGHT

Give it a rest! Overnight watering makes it difficult for the water supply to replenish itself; help keep water availability at a safe level by only watering during early morning hours (4:00 to 8:00 am)

TAKE YOUR TURN

Each home is allowed two watering days per week according to the street address, so know your days and stick to them! Even addresses may water on Wednesdays and Saturdays, and odd addresses may water on Sundays and Thursdays.

WATER FOR ONE HOUR ONLY

One hour is enough time to give your lawn and landscaping the water it needs. Set your irrigation system to one hour only all stations.
